Subject: CES: Draft Schedule Through Jan 23

Hello:

We need to discuss the activities the remainder of this year and the beginning of next year sometime next week so we are all on the same page but I want to get alot of waste off-site next week so we need to make it happen. Most everything else is set up to go except that I have not heard anything about FT1004 nor do we have a firm schedule for the remainder of the ASTs. All of the ASTs should be ready to go so I know we can make it happen as well. We will deal with the sludge the first week in January (ie. getting it out of the tanks).

I have alot of things I want to get done next week so we need to be ready to make it happen. I will be another crunch time busy week.

Also, please look at the follow on schedule and put your heads together on getting this project activities on this list so we know where we are going and about when we will complete.

Thanks for your efforts this past week.
